

FAWN CHANDELIER

CHAFAWN3628WH

MG000104

Strikingly modern or incredibly organic? The unique design of our white gesso Fawn can go either way. A chiseled finish inspired by '60s metalwork creates a strong, angular aesthetic—the branch-like arms of the candelabra-shaped fixture evoke a natural vibe. This stark-but-soft chandelier gives off wonderful light in every environment. Concrete material naturally distresses. Minor cracks and imperfections are to be expected.

WHAT TO EXPECT?

Our concrete is made from a mix of cement, sand, aggregate, and water. Due to the way the material is mixed, the color of concrete can vary slightly from light gray to darker gray and can even appear to have a washed effect, adding to each product's unique charm. Also, due to the nature of this material, pinholes, seam lines, air bubble marks, and small cracks may occur, and a patina is expected to develop over time. These characteristics are a testament to concrete's beauty as it ages and are

materials. To avoid undesired changes to the finish, it's best to protect this material from the elements. You can also refer to our care guide for further instructions.
