WHAT TO EXPECT?

Rattan is typically harvested from rattan palms, which grow in tropical regions, and the appearance and texture can vary depending on the environment. For example, whether the season was more dry or wet than usual can impact its natural color, and the time of year it's harvested can affect how it absorbs color. Some might even include small marks of darker shades, leaving each piece with a subtle sense of individuality. These types of variation are why we love utilizing natural materials for our designs; they offer each piece its own hint of character.

Our mirrors are designed to be hung by a professional, usually by wire. Actual hanging specifics vary on a case by case basis and depend on several variables, including the mirror weight and wall type. Incorrect hanging can result in damage to the mirror or the wall. Made Goods is not responsible for damage due to incorrect hanging of our pieces.
